Reasons for allowance

1. Claims 1-37 are allowed.

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest the recited coated body further including the coated body is heated to 100 C satisfy the following equation (1) $a \times b \geq 0.42$

wherein, a: infrared integrated emissivity from the surface side of the substrate covered with one of said respective thermal radiative coatings and b: infrared integrated emissivity from the back side of the substrate covered with the other one of said respective thermal radiative coatings. Additionally, the prior art of record does not teach or suggest the recited coated body further including integrated emissivities at infrared waves (wavelength: 4.5 to 15.4 μm) when the body is heated at 100 C satisfy the following equations (4) and (5): $b < 0.9 (a-0.05)$ (4) $(a-0.05) \times (b-0.05) > 0.08$ (5) in which, a: infrared integrated emissivity from the surface side of the substrate covered with thermal radiative coatings and b: infrared integrated emissivity from the back side of the substrate covered with the coating.

The prior art of record does not teach or suggest the recited coated body further including at least one of said respective thermal radiative coatings contains a blackening additive; and at the same time, satisfies the following equation (2):

$(X-3) \times (Y-0.5) \geq 15$, wherein X represents the content (mass%) of the blackening additive contained in the thermal radiative coating, and Y represents thickness (μm) of the coating. Additionally, the prior art of record does not teach or suggest the recited

coated body further including said thermal radiative coating which contains a blackening additive and satisfies the following equation (6): $(X-3) \times (Y-0.5) \geq 3$, wherein X represents the content (mass%) of the blackening additive contained in the thermal radiative coating, and Y represents thickness (μm) of the thermal radiative coating.

The prior art does not teach motivation or suggestion for modification to make the invention as instantly claimed.

Any comments considered by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
